

► DuPage Medical Group / Lisle, Illinois

Assignment:

To create an imaging Institute which would offer MRI, CT and X-ray capabilities, as well as a Women's Health Center including DEXA, ultrasound and mammography units. The client required a well located facility that would convey a highly professional corporate image.

Solution:

V3 Realty Company identified an ideal building and negotiated a lease for 8,268 square feet plus basement space for record storage. V3 also acted as Development Manager coordinating architect, contractor, and specialty vendors including MRI and data phone cabling. The highly complicated project was accomplished in 12 weeks, which included demolition and reconstruction of an exterior wall so MRI equipment could be installed. All work was completed without disturbing neighborhood tenants. ▲
