

► PPC Industries, Inc. / Pleasant Prairie, Wisconsin

*Assignment:*

V3 Realty was engaged to study and recommend the best solution for PPC's expanding real estate needs at its Pleasant Prairie, Wisconsin headquarters and manufacturing operation.

*Solution:*

After a comprehensive analysis, it was determined that a relocation and expansion of its existing warehousing in the manufacturing facility would be the most functional and cost effective way to solve its growing manufacturing needs. To gain local insight into the market and conform to Wisconsin licensing requirements, V3 engaged and managed a local broker to assist in identifying the best available properties.

This process resulted in the discovery and acquisition of a 75,000 S.F. building adjacent to its current location, which provided excellent current and future expansion flexibility. ▲
